

Starting Over

1 2 3 4

Verse 1

You said goodbye to me last night, I couldn't believe it was true.

I'd always trusted you implicitly, but you were seeing somebody new.

Chorus

I'm gonna have to start over, what else can I do

Gotta get out the black book and go all the way through

Gonna get on my cell phone and call every girl I ever knew

It's gonna feel pretty strange, but what else can I do

Verse 2

I can't eat, I can't even sleep, I'm so used to being with you

I'm walking around in a daze, everything I see reminds me of you. **Chorus**

Middle

I'll never understand what went wrong between us

We were the perfect couple so everybody said

Maybe we got too used to each other

Or some other guy's words swelled up your head.

Instrumental Break

Verse 3

Starting over is going to be so hard, but that's what you forced me to do

Gonna have to start seeing somebody new, but I'll be comparing everyone to you. **Chorus**

(Last line after chorus)

I'm gonna have to start over, what else can I do.
